

KNPC Facing Corona

البتروال الوطنفة
KNPC

Welcome my friends! My name is “Sanad”.

I grew up in Kuwait and work for Kuwait National Petroleum Company (KNPC).

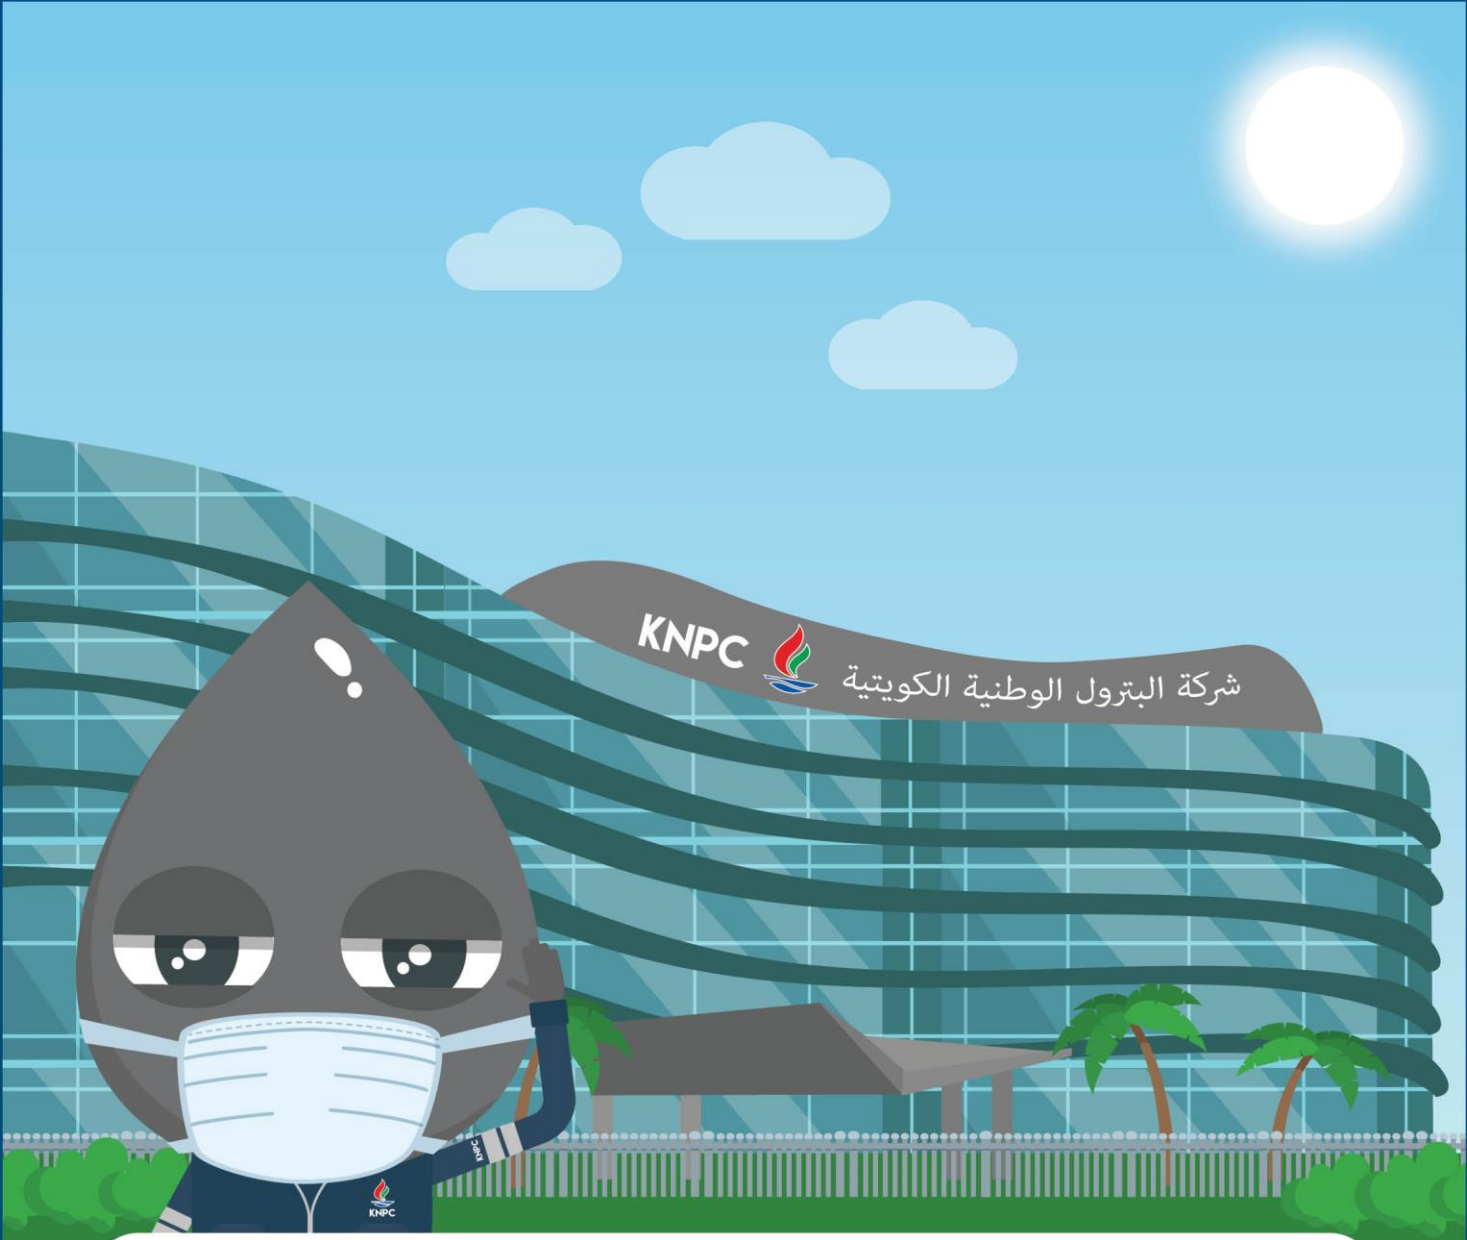

I regret that some people think that our work is limited to oil refining only, despite the fact that our Company provides many services to society.

Therefore, I want to share with you how our Company faced the Corona pandemic (Covid-19) with determination and persistence, while continuing to fulfill its role in providing its services.

**While everyone was at home, we
had the honor to serve the Country.**

For the sake of our beloved Kuwait and in response to the call of duty, we joined the front lines to serve our society and help it overcome this critical crisis.

While cases of infection were on the rise, our Medical Team was working day and night to ensure the safety of our Company employees.

**We were keen to follow health directions, and
sterilize work sites on daily basis.**

We continued our work and maximized our efforts with determination and persistence, where the role of national cadres was evident.

Mina Al-Ahmadi Refinery confronted the pandemic thoroughly, whereby it operated all units of the Clean Fuels Project (CFP) successfully.

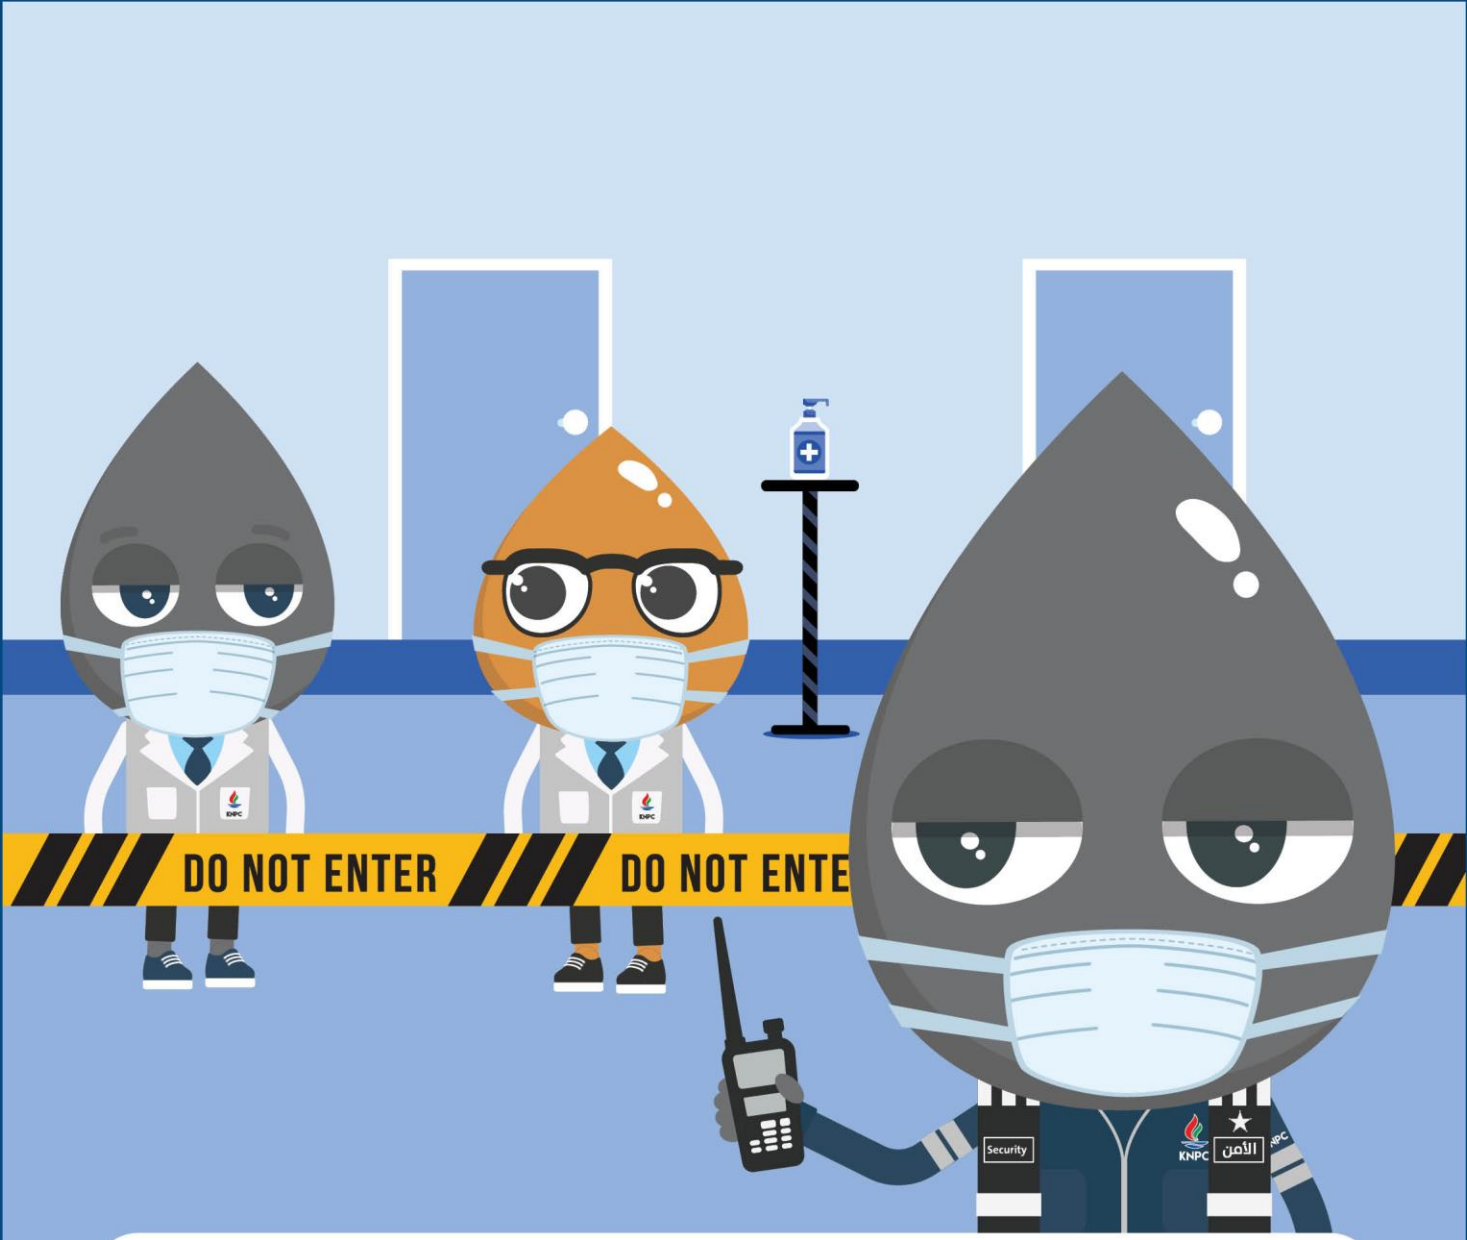

We exported the first shipment of petroleum coke to global markets, a fact that validated Kuwait's economic position.

Likewise, Mina Abdullah Refinery has put into operation several of its units that will have a significant positive impact on the environment for many years to come.

The Firefighting Team has always been on alert and ready to face any emergency that might hinder the progress of our business and tasks.

Similarly, Security personnel urged our employees to follow health directions, and in that, they were quite helpful to the Medical Teams.

To limit the virus spread, our Company furnished various Centers in coordination with Government authorities.

KNPC employees paid visits to the quarantine Centers and provided them with Medical Equipment. The Company also entertained the children by giving them toys that cheered them up.

We have continued to meet the needs of the local market for petroleum products. Moreover, we opened several smart Filling Stations.

We trained our employees to better serve customers according to health guidelines, while carrying out internal and external awareness campaigns to help minimize the spread of the pandemic and maintain the safety of everyone.

**The pandemic did not prevent us from meeting our environmental goals.
We took part in various cleaning campaigns that serve and
protect the environment.**

Some Employees volunteered to create tools that help everyone adhere to health requirements.

Our concerned teams continued to perform their duty in reporting important news around the clock, which helped in easing the community throughout the pandemic period.

For that, we thank our competent employees for their keenness and insistence on playing their role to fight the pandemic.

Hope you all stay sound and safe !

Information of Interest

Kuwait National Petroleum Company (KNPC):

A State-owned Company established in 1960 responsible for refining of crude oil, gas processing and distribution of refined products within the local market. The Company owns and operates two Refineries: Mina Al-Ahmadi and Mina Abdullah.

Oil:

Oil is a natural substance extracted from the inner earth geological formations that accumulates through a slow transformation of organic matter.

Chemically, oil is well-known as a complex mixture of hydrocarbons and when extracted from the ground it is referred to as crude oil, which undergoes a refining process to obtain various types of products and oil derivatives.

Crude Oil Refining:

Natural crude oil cannot be used directly, as it requires refining, treatment and separation into a wide variety of petroleum products. This process is carried out in the crude oil Refineries.

Information of Interest

Petroleum Products:

Represent the chemical compound produced by the crude oil refining process, which is the basic target of crude refining.

They are classified either according to their use as a source of Energy, be it car gasoline, gas oil (diesel), kerosene, and others or as a product of naphtha, lubricating oil, asphalt, and a variety of others.

Clean Fuels Project (CFP):

Considered to be one of the most key and major Projects in Kuwait oil sector.

The Project aims to upgrade Mina Al-Ahmadi and Mina Abdullah Refineries to produce Environment-friendly products that comply with the very high standards as imposed by USA and European countries.

This shall enable KNPC products to compete world-wide.
